1310163268	12/02/1986	37Y 3M / M	OPD	.

HISTORY: Annual check-up

COMPARISON: September 18, 2023

TECHNIQUE: PA view

FINDINGS:

Present study shows no acute parenchymal opacities or areas of consolidation.

Heart is normal in size.

Both hemidiaphragms and bilateral sulci are intact.

Mild rightward deviation of the thoracic spine likely due to positioning.

IMPRESSION:

Essentially normal chest.

This radiologic interpretation is only a part of the overall assessment of a patient's condition. It must be correlated with the clinical, laboratory and other ancillary parameters for a comprehensive analysis. Therefore, radiology reports are best explained by the attending physician to the patient. Images are available in the PACS for your inspection.

Wilson T. Tan, MD
(RADIOLOGIST)
