ULTRASOUND REPORT

TYPE OF EXAMINATION: Whole abdomen ultrasound.**FINDINGS:**

The liver is normal in size, contour and echopattern. Echogenicity is increased. No focal parenchymal mass is noted.

The intrahepatic and extrahepatic ducts are not dilated. The common duct is normal in caliber.

The gallbladder is normal in size and configuration. The GB wall is not thickened. A 0.5 cm non mobile nodular echo seen intraluminally. No pericholecystic fluid collection is noted.

The pancreas and spleen are normal in size and echopattern. No focal mass is noted.

There is no disparity in renal sizes. The right kidney measures 9.4 cm in length and the left kidney measures 10.0 cm. Cortical thickness and echogenicity are normal. The central echo complexes are intact. No focal mass is noted. No renal stones are seen.

The urinary bladder has smooth mucosal outline. No intraluminal echoes are seen.

The uterus is antverted. Normal size and contour. ES= 6.0 mm. No focal lesion

The ovaries are normal in size and echopattern. No focal lesion in the adnexal regions

The visualized aorta is unremarkable

IMPRESSION:

Hepatic steatosis

Gallbladder polyp

Normal sonogram of the biliary tree, pancreas, spleen, kidneys, urinary bladder, uterus, ovaries, adnexae and abdominal aorta.
